DETAILED ACTION

This office action is in response to applicant's communication, received 10/3/03.

The prior restriction requirement is withdrawn.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 7, 9, 10, 13-19, and 21-23, drawn to Ultralente-like crystals, comprising :

- a) a derivatized protein selected from the group consisting of human insulin derivatives; and
- b) a divalent metal cation

Group II, claim(s) 5, 6, 11-18, 20 and 24-28, drawn to Ultralente-like crystals, comprising:

- a) a protein selected from the group consisting of insulin and insulin analogs;
- b) a derivatized protein selected from the group consisting of human insulin derivatives; and
- c) a divalent metal cation

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature (as defined by the first presented composition) is Ultralente-like crystals, which is a known compound (see attached references- WO 98/42367- pg. 3, line 7-pg.4, line 29; pg. 5, lines 14-16; examples I, II, and IV and WO 98/42368- pg. 3, line 17-pg. 4, line 30; examples I-V). Thus, the special technical feature which links the claims does not provide a contribution over the art, so unity of invention is lacking.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
